CALCOLO DELLE QUANTITÀ DI MODANATURE

Per le modanature: misurare il perimetro della stanza e aggiungere il 10% per compensare le perdite dovute al taglio degli angoli.

Per le cornici da parete e i battiscopa: misurare il perimetro della stanza e sottrarre la larghezza delle aperture, come porte e finestre. In questo caso, prevedere una perdita del 5%.

LE ALTRE DIMENSIONI INDICATE
SONO ARROTONDATE A ± 5 MM.
